

Facility and Event Registration Form

Business/Organization Name _____ Type of Facility: _____

Contact Name _____ Title _____

Phone # _____ Email Address _____

Address for requested visit _____

City _____ State _____ Zip _____

Will there be other animals present? No Yes, from _____

Does your facility have any additional requirements that need to be met prior to the first visitation?
 No Yes, explain: _____

Please review the chart below to determine your facilities environment type.

What type of environment does your facility have? Predictable Moderate Complex Unsure

If you are unsure of your environment, our Pet VIP Coordinator would be happy to visit your facility.

Would you like to request a visit to determine your environment type? No Yes

Predictable Environment

Quiet environment

- Routinely anticipated interactions
- Low activity
- Few distractions

Staff members don't move around the facility much.

Clients are too sick to be active- they mostly stay in bed or sit quietly.

Clients do not talk much, or they talk in very quiet voices.

Floors are carpeted and don't echo sound.

There are very few noisy machines or carts.

Moderate Environment

Ranges from Predictable to Complex environment, depending on facility

- Moderate activity
- Moderate distractions
- Occasionally unanticipated interactions

Staff members are somewhat active- moving from room to room, supervising clients, etc.

Some clients are up and moving around- perhaps using walkers, canes or wheelchairs.

Clients are talking, and there may be occasions of loud talking, laughing or arguing. Clients may be gesturing as they move about or talk.

Music may be playing, or sounds of other activities may be heard through the walls. Floors may be linoleum or tile; windows may not have curtains and walls may echo sounds.

Machines in the environment may include those dispensing canned soft drinks (clunk!), a pneumatic tube communication system (whoosh, thump), and IV or body systems monitors (beep beep).

Complex Environment

Active environment

- High activity
- Many distractions
- Routinely unanticipated interactions

Staff members are active nearly all the time- rushing from room to room, walking hurriedly and with purpose, wheeling carts (medicine, food, linens, etc.)

Clients are active during the visit, or you may visit a group of active clients. Client behaviors are unpredictable- clients may lack muscle coordination, causing sudden movements, may be living in a delusional world inhabited by people or things the rest of us cannot see, or may be excited and impulsive.

There is constant noise from clients' talking, crying or shouting, music, neighboring rooms, intercom systems, a nearby emergency room or an airport.

General noise may be amplified because of hard flooring, lack of upholstery on furniture, lack of curtains, etc.

Are you requesting ongoing visitations to a facility or an event?

Ongoing visits

What days are you requesting pet visitation. Select all that apply:

Monday Tuesday Wednesday Thursday Friday Saturday Sunday

Preferred time: _____ Preferred pet: Any Dog Cat Other: _____

Frequency of requested visits: Weekly Bi-weekly Monthly Custom: _____

Stress Relief Event

Event Name: _____ Event Date: _____ Event Time: _____

Tabling Event

Event Name: _____ Event Date: _____ Event Time: _____

Other: _____

The Humane Society of Southern Arizona's free program depends on the availability of our amazing certified Pet VIP therapy volunteer teams (handler and pet); we are unable to guarantee the number of teams that volunteer at your facility or event.

Please be aware that for events we must keep the visitation time shorter, in order to avoid over stressing the pets in a very active or unpredictable environment. We usually create an hour to an hour and a half shifts. We also require that the teams are afforded an area that provides shelter, water, and seating for the team handlers and pets. The space where they are placed must be large enough to provide at least six feet distance between teams, as they are not allowed to interact so they may focus on the people they are providing comfort, support, or motivation to.

For the protection of our therapy pet teams, your staff, clients, and members of the community, we require every facility to have CDC recommended policies and procedures for infection prevention in place for all people in the facility.

- All participants wear face coverings.
- Hand Sanitizer of 65% or more alcohol content is made readily available to use before and after petting the therapy pets.
- All surfaces where the teams will be are cleaned according to CDC recommendations.
- Space shall be provided to the teams and crowding around the teams is not allowed. Individuals shall respect the 6' social distancing and wait to interact with the team individually after sanitizing their hands.

For more information contact the Humane Society of Southern Arizona's Pet VIP Coordinator by calling 520-327-6088, ext. 153 or by emailing petvip@hssaz.org
